

10 AMP POWER RELAY

HP-RELAYS

FEATURES

- Interchangeable with existing models
- · Long life and high reliability
- High contact capacity up to 10 A 250 V AC
- Available with plug-in/solder and quick-connect terminals

mm inch

SPECIFICATIONS (at 20°C 68°F)

		1A	0.6 A	0.1 A	0.06 A	2×10 ⁶	
Mechanical life							

Life curve

Notes:

- 1. For DC inductive loads, use an arc suppressing circuit.
- 2. When used under a DC load operating at high repetition rate with considerable arcing, corrosion of the contacts and/or the contact blades is likely to occur. When using the relay under conditions of high temperature, humidity or high repetition rate, it is suggested that the relay cover be removed to facilitate extended operation.

TYPICAL APPLICATIONS

HP relays enjoy wide use in various applications, particularly in automation controls and remote controls.

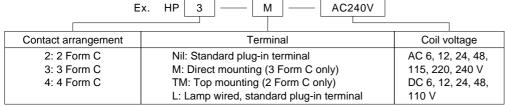

Applications include:

Industrial machinery

Machine tool
Food processing packing machines
Office equipment
Coin operate devices
Home appliances

Transportation
Communication and measuring devices
Amusement devices

ORDERING INFORMATION

- (Notes) 1. For UL/CSA or VDE recognized types, add suffix UL/CSA or VDE (HP2-TM type VDE application under way)
 - 2. Standard packing Carton: 50 pcs. Case: 200 pcs.
 - 3. UL/CSA approved type is standard.

TYPES AND COIL DATA

NOTES

- 1. The range of coil current for AC relays is ±15% (60 Hz). For DC relays it is ±10% at 20°C, 68°F.
- 2. The HP relay will operate in a range from 80% to 110% of the nominal coil voltage. It is, however, recommended that the relay be used in the range of 85% to 110% of the nominal coil voltage, with the temporary voltage variation taken into consideration.
- 3. When the operating voltage of AC re-
- lays drops below 80% of the nominal coil voltage, the relay will generate a considerable amount of heat which is not recommended for maximum efficiency.
- 4. The coil resistance of DC types is the measured value of the coil at a temperature of 20°C 68°F. If the coil temperature changes by ±1°C, the measured value of the coil resistance should be increased or decreased by 0.4%.
- For applications from 220 V to 240 V DC, connect a resistor in series with the relay coil. See chart for resistor values.

Voltage	2 Form C	3 Form C	4 Form C
220 V DC	7.3 kΩ (5 W)	7.45 kΩ (5 W)	7 kΩ (5 W)
240 V DC	8.7 kΩ (5 W)	8.8 kΩ (5 W)	8.3 kΩ (5 W)

2. Standard plug-in terminal type (with lamp wired)

1. AC 48 V type is not available for lamp wiring.

Circuit diagrams

Notes:

1. Pay attention to the polarity of coil See circuit diagram (LED type only).

Operating current of LED

Operating current of LED
DC 6.4 mA
DC 5.7 mA
DC 4.7 mA
DC 4.5 mA
AC 10.5 mA
AC 9.0 mA
AC 7.7 mA

Notes:

1. Operating current of relays should be increased by the value of LED operating current. Please refer the table. Operating current of neon lamp is approx. 0.3 mA to 0.4 mA.

2. To use the HP relay in the inductive load cir-

To use the HP relay in the inductive load circuit, the contact protection circuit is recommended.

ACCESSORIES

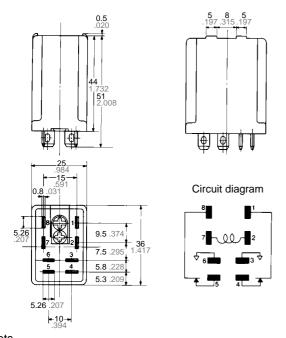

Please refer to "MOUNTING METHODS" for further information. UL, CSA recognized except BRACKET and INSERTING PLATE.

ACCESSORIES for HP2 and HP4 types

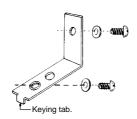

HP Bracket (with 2 screws, 2 washers) The HP Bracket is used for mounting HP2 relays and HP4 relays directly to the panel. It facilitates soldering or quick connections with Faston 205 tab 0.8 mm .031 inch.

Notes:

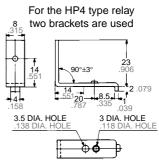

- 1. This bracket is unavailable for UL, CSA and VDE applications.
- 2. When using the special bracket, it is recommended to use the screws and washers called out in the chart in the next page in order to eliminate any possible damage to the relay coil.

Mounting methods

(a) Remove the M3 \times 7 screw (red colored) fixed to the relay, and place the bracket on the relay with the attaching M3 \times 7 screw (blue colored) and the spring washer.

(b) Use the additional $M3 \times 7$ screw and washer for attaching the bracket to the panel.

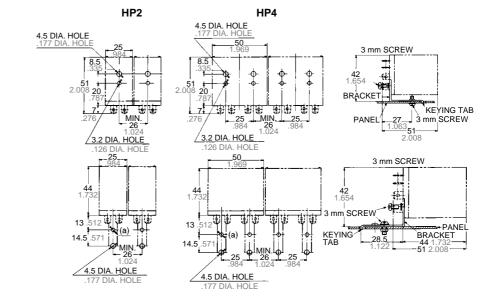

Thickness of a special bracket	1.0 mm (.039 inch)	1.6 mm (.063 inch)	2.0 mm (.079 inch)	
A suitable screw	$M3 \times 7 - M3 \times 8$	M3 × 8	M3 × 8-M3 × 10	
A suitable washer	for M3	for M3	for M3	
	Screw M	3 × 7		
Millimeter				
3mm .118inch diameter				
7mm .276inch length				

Dimensions and mounting method

mm inch

- 1. Rear-surface mounting
- 2. Front-surface mounting

HP Inserting Plate for HP2 and HP4 types

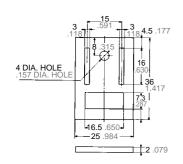

1. HP inserting plate is used for mounting HP2 and HP4 relays on a printed board to adjust the length of the terminals.

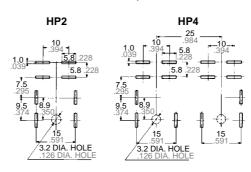

2. If adjustment by soldering is not suitable, bore 1/8" diameter hole on the printed circuit board and mount the relay with a $M3 \times 10$ screw. The chart to the right suggests the proper screws for different printed circuit boards.

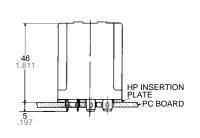

3. Two plates are used for the HP4 type relay.

Thickness of P/C board	Suitable screw
1.0 mm .039 inch	M3 × 10
1.2 mm .047 inch	M3 × 10

PC board pattern

Please refer to the above second instruction.

Tolerance: $\pm 0.1 \pm .004$

For Cautions for Use, see Relay Technical Information (Page 48 to 76).
